

Performs Arithmetic Field calculations more Flexibly than Calc Agent

Features

Performs calculations at Field Nominated File level. Calculations are not required to be in the forms as in Calc Agent.

Can create new data fields. Even if the field doesn't exist, JetTrac Calc™ will create it for you.

Works with subforms. JetTrac Calc calculates data even across subforms.

Runs on any platform. JetTrac Calc is written in Java so it can run on platforms that are not supported with JetForm Central Pro™ such as AS/400 and UNIX.

The Company

Pro Technology Automation is an industry leader for developing custom JetForm Central™ solutions. Pro Technology has over six years of experience with hundreds of clients, providing both custom agents and development, consulting, implementation and training for JetForm Central solutions.

Other Products

Pro Technology markets and installs a large variety of its JetTrac™ JetForm Central™ custom agents that give JetForm Central the functionality your business has always needed but lived without until now. Some of the many functions include sorting records, separating documents for different printers, reformatting addresses, reprinting, and more that automate tasks traditionally handled by one or several employees. We can even develop a custom agent specifically for your needs.
