

# JetTrac Lookup™

## **Uses data lookups to dynamically insert MICR information and missing data**

### **Features**

**Simplifies check printing runs.** JetTrac Lookup enables printing of the MICR line for different banks and different account numbers with the same form and data file.

**Low maintenance when bank accounts change or are added.** Change only one file and checks will print with the new account numbers and bank info.

**Change check account numbers and/or signatures on the fly.** You specify the dollar amount and JetTrac Lookup™ inserts the necessary data automatically to dynamically print the correct signature.

**Conjures up data.** JetTrac Lookup inserts the data that you need to have in your output but your ERP system can't generate, such as fax numbers and E-mail addresses.

**Cross-Platform.** JetTrac Lookup is a Java program that supports all Java platforms.

### **The Company**

Pro Technology Automation is an industry leader for developing custom JetForm Central™ solutions. Pro Technology has over six years of experience with hundreds of clients, providing both custom agents and development, consulting, implementation and training for JetForm Central solutions.

### **Other Products**

Pro Technology markets and installs a large variety of its JetTrac™ JetForm Central™ custom agents that give JetForm Central the functionality your business has always needed but lived without until now. Some of the many functions include sorting records, separating documents for different printers, reformatting addresses, reprinting, and more that automate tasks traditionally handled by one or several employees. We can even develop a custom agent specifically for your needs.
