

Automatically separates single page documents from multiple page documents

Features

Use with Fold and Seal equipment that support only single page documents.

JetTrac PressureSeal™ automatically separates out the pages that can't be machine-sealed.

Adapts to different documents. JetTrac PressureSeal counts the detail lines to determine how many pages will be printed for each document and sends multiple-page documents to a different printer/process.

Gives each output job its own job card. JetTrac PressureSeal gives each output file the job card you specify so processing can continue inside of JetForm Central.

Gives your mailings a more professional look. Allows you to send multiple-page documents in a single enclosure instead of in separately-sealed pages.

Save your staff time and effort. Eliminates manually sorting through documents looking for multiple-page documents.

The Company

Pro Technology Automation is an industry leader for developing custom JetForm Central™ solutions. Pro Technology has over six years of experience with hundreds of clients, providing both custom agents and development, consulting, implementation and training for JetForm Central solutions.

Other Products

Pro Technology markets and installs a large variety of its JetTrac™ JetForm Central™ custom agents that give JetForm Central the functionality your business has always needed but lived without until now. Some of the many functions include sorting records, separating documents for different printers, reformatting addresses, reprinting, and more that automate tasks traditionally handled by one or several employees. We can even develop a custom agent specifically for your needs.
