

Sorts JetForm Central™ Documents

Features

Sorts documents by up to three different key fields. You specify the fields and the sort order and JetTrac Sort™ automatically rearranges documents in the desired order.

Flexible sorting options. SortTrac can sort each field ascending or descending and by numeric or alphanumeric rules.

Speeds processing time. All of your documents come out in the right order, saving your staff many hours of separating and processing printed output.

Streamlines reprinting and troubleshooting. When you have a printer jam or want to go back and retrieve printed data, it will already be in order. Your staff will have more time for the projects that they were hired for.

Saves paper. Instead of having to reprint a whole batch, just reprint the few you need.

Cross platform. Runs on any server that supports Java, such as NT, UNIX and AS/400.

The Company

Pro Technology Automation is an industry leader for developing custom JetForm Central™ solutions. Pro Technology has over six years of experience with hundreds of clients, providing both custom agents and development, consulting, implementation and training for JetForm Central solutions.

Other Products

Pro Technology markets and installs a large variety of its JetTrac™ JetForm Central™ custom agents that give JetForm Central the functionality your business has always needed but lived without until now. Some of the many functions include sorting records, separating documents for different printers, reformatting addresses, reprinting, and more that automate tasks traditionally handled by one or several employees. We can even develop a custom agent specifically for your needs.
