

Field Service for UST/AST

JetTrac Field Service for UST/AST is a state-of-the-art mobile data capture and compliance testing solution designed specifically for use by UST Service Providers performing compliance testing and inspections for the regulated underground and above ground storage tank (UST/AST) community.

JetTrac Field Service will transform your field and site testing & inspection processes into a 100% electronic workflow and approval process. This results in significantly reduced cycle times and fewer errors which will improve customer satisfaction and mitigates your risk of NOV (Notice of Violation).

The system includes intelligent and fillable electronic Vapor Recovery and Environmental Compliance forms including the California CARB and CUPA forms, PEI forms, and any other custom forms you may need. ProTechnology has designed these compliance forms with embedded calculations, significantly reducing human errors associated with data entry.

The compliance forms and work orders can be easily dispatched electronically to field technicians. The technicians receive the forms on mobile devices and are able to fill out the forms faster and with much greater accuracy, online or offline. Best of all, previous inspection data and site survey /map layout about the inspection site are instantly available in the forms. When finished, the technicians can submit the forms back to the office with a simple click.

Secondary Containment Testing Report Form

This form is intended for use by contractors performing periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and protocols from tests (if applicable), should be provided to the facility owner/contractor for submission to the local regulatory agency.

1. FACILITY INFORMATION

Facility Name: Shell Gas Station Date of Testing: 2015-01-29
 Facility Address: 26201 La Paz Rd, Mission Viejo CA 92691
 Facility Contact: Mike Yipson Phone: (949) 557-1248
 Date Local Agency Was Notified of Testing: 2015-01-06
 Name of Local Agency Inspector of ground during testing:

2. TESTING CONTRACTOR INFORMATION

Company Name: ProTechnology
 Technician Conducting Test: Ryan Brown
 Credentials: ☒ SWPCB Licensed Tank Tester ☒ ICC UST Service Technician
 License Number: 487509
 Manufacturer: ☒ TestTrac Date Training Expires:

3. SUMMARY OF TEST RESULTS

Component	Pass	Fail	Not Tested	Component	Pass	Fail	Not Tested
8" W. Annular	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	8" F. Fill Sump	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8" E. Annular	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	8" W. Sump	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

8" F. Fill Sump	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>				

If hydrostatic testing was performed, describe what was done with the water after completion of tests:
 The water was taken back to corporate for testing.

For any equipment capable of generating a print out of test results, you must attach a copy of the test report to this certification.

CERTIFICATION OF TECHNICIAN RESPONSIBLE FOR CONDUCTING THIS TESTING
 To the best of my knowledge, the data used in this document are accurate and in full compliance with legal requirements.

Forms Dispatch & Form-Filling Features

The Forms Dispatch Application creates an electronic forms package of the required testing & inspection forms for each inspection site. **JetTrac Field Service for UST** will pre-populate important data such as customer, facility, test results, site survey/map layout etc. from previous inspections on the forms and automatically send the forms package including work orders to your technicians, making the process of completing the forms faster and with fewer errors.

- Includes PEI forms, California CARB & CUPA forms and can add any other custom or mandatory state forms to ensure full compliance.
- Allows the user to select a predefined forms package or create your own custom testing & inspection form package by simply clicking on the required forms in the desired order.
- Google Calendar integration - whenever a dispatch is sent the appointment will show up in the technician's Google Calendar and the master calendar at the office.
- Provides the field technician all the pages they need to complete any test/inspection even for really large customer sites.
- Automatically validates that the field technician has the proper certification to perform the required test or inspection prior to dispatching.
- Mobile device friendly data collection through speech-to-text voice recognition, checkboxes, drop-down lists, mandatory fields, calculations and customized text fields (dates, validation, etc.) to make data collection simple and easy and reduce mistakes.
- Easily capture customer's electronic signatures and photos right into the forms.
- Bookmarks and thumbnails allow for quick and easy navigation through the package of forms.
- Includes email workflow and approval process for inspections. Once the inspection is approved by a supervisor or manager, a final document package including a cover letter can be automatically created, archived, and can even be automatically sent to the customer and/or the regulating agency.
- Final forms package is automatically uploaded to Google Drive for easy review, retrieval and archiving.
- Work online or offline in the field.
